ORDINARY PERMIT

Fee: R 50.00
Receipt No: 1996/2014

Permit No: OP 2245/2014
Contact: Miss S.M. Hughes

This permit is issued in pursuance of the provisions of the Nature Conservation Ordinance No 15 of 1974 , Chapter 5 and the Regulations framed thereunder.

The permit is issued to:

ID Number: 6208305781086

Mr Luke Cornell
Union Pictures
P.O.Box 548
Bot River
Cape
7185

Residential Address
Cornellskop
Van Der Stel pass road
Bot River

Province: Western Cape

In the capacity of Owner

To Import, Keep in Captivity and Export the following species of Mammals

SQUIRREL MONKEY	SAIMIRI SCUREUS
2 (Two) Male	

To:

Owner:

ID Number: 6208305781086
Mr L Cornell
Thorn Tree Lodge
39 Adams Road
Hayfields
Pietermaritzburg

Conservation District: Pietermaritzburg

Province: KwaZulu-Natal

TERMS AND CONDITIONS UNDER WHICH THIS PERMIT IS ISSUED

1. It is valid only:
 - (i) from : 31 May 2014
to : 30 June 2014
 - (ii) in the original
 - (iii) if all 6 pages are signed by the permit holder named above
 - (iv) to the permit holder named above
2. By signing the permit or licence the holder accepts, and agrees to comply with the conditions under which it is issued.
3. The issue of this permit does not absolve the holder from the necessity of obtaining such other permits and documents as may be required by law for the movement of the abovementioned species.
7. This permit is valid only if an export/import permit has been issued by the export/import province/country if the legislation applicable in such province/country prescribes such permit.
8. Valid for one consignment only.
9. This permit is not transferable
10. Unless expressly waived or qualified in the permit, the permit holder (hereinafter referred to as the "Holder") shall comply with all general and applicable specific terms and conditions contained herein and all relevant statutory provisions.
11. In the event of it becoming impossible for the holder to comply with the terms and conditions as a result of circumstances entirely beyond the control of the holder, the local Conservation Officer shall immediately be informed of the nature and extent of such impossibility and the circumstances responsible therefore, and the holder shall immediately take all reasonable steps necessary to regain compliance.
12. Any animals kept in captivity without authority, in a poor state of health, showing signs of chronic stress, distress or self-damaging stereotypic behaviour, or held in contravention of these conditions may, on good cause shown, be seized and confiscated by a Conservation Officer, after reasonable notice and opportunity to make representations had been given to the Holder and following his failure to remove the cause of complaint.

Conservation, Partnerships & Ecotourism

13. No animals in excess of those approved in the permit may be kept, unless authorised in writing by the Authorised Authority on disclosure of special circumstances or authorised in terms of an approved Breeding Plan.
14. All animals must at all times have sufficient, clean and palatable drinking water in adequate quantity supplied in a manner as consistent as is reasonably possible with the species' natural drinking behaviour or other appropriate species-specific means of hydration.
15. All animals must be provided with a diet of sufficient fresh species-suitable food, in sufficient quantities, supplied in a manner reasonably consistent with the species' natural feeding behaviour. Appropriate dietary supplements (vitamins, grit, etc) should be provided as required for the species, especially if animals are held indoors for extended periods.
16. Enclosures must be kept clean, and unpalatable food removed timeously.
17. Every animal shall at all times be provided with adequate protection and shelter from the elements (heat, cold, rain, hail, sun) and a safe haven or retreat in which to rest and feel secure, which is always accessible.
18. An active and dynamic environmental enrichment programme, appropriate for the species, must be implemented for every animal.
19. No animal in captivity shall be subjected to physical punishment, water - food - or sleep deprivation, social isolation, instrumental use of electricity, objects used to hit, pinch, poke, prod or physically coerce, chains, ropes, or any means which may result in pain, discomfort, stress, anxiety, depression or a poor state of health and no animal shall be made to behave in an unnatural manner or in a manner which causes pain, discomfort, stress, anxiety, depression or which may place the animal's health at risk.
20. Physical, chemical or other methods of immobilisation of animals may only occur for veterinary and transport reasons, and may only be done according to standard veterinary practice, or by means approved for that species/taxa (as specified in taxa specific conditions below).
21. Unless authorised in writing by the local Conservation Officer, for good reason for the welfare and safety of the animal, no animals may be, or may have been, subjected to chemical administration or permanent physical mutilation for behavioural manipulation.
22. Enclosures and furnishings must provide a safe environment for the animals enclosed therein, in keeping with the nature of the species, and shall be maintained in a condition and manner that presents no likelihood of harm to the animals contained therein. Every effort should be expended to ensure that no animals are exposed to disturbing noises, rubble, sharp objects, broken fences, dangerous protrusions, toxic chemicals or any other objects, substance or material which could harm them.
23. No animal listed herein may be kept in captivity alone, except where the separation is needed to ensure the safety or welfare of the animal or other animals at the facility, on the written

recommendation of a veterinarian. In the event of any animal being separated or isolated, the holder shall inform the Local conservation officer within 5 days of the circumstances of separation or isolation, and in the event of separation/isolation exceeding 1 month written approval must be obtained from the Local Conservation Officer.

24. Alien animals shall not be held in the same enclosure as indigenous animals, and species that may hybridize must be kept separate.
25. The enclosure housing animals shall be constructed and furnished to ensure the well-being and enrichment of each animal. The size of the enclosure must be 2.5 meters long, 2 meters wide and 2 meters high and must comply with the species specific social, environmental, enrichment and furnishing requirements prescribed in **Table 1 of the Procedures and Standard Terms and Conditions for keeping wild animals in captivity, KwaZulu-Natal, South Africa adopted by the Ezemvelo Board in October 2013**. Such requirements are exempt during approved temporary relocation for veterinary treatment.
26. Animals may only be restricted to a transport container or trailer whilst in transit between different locations or in preparation for immediate transit (within 3 hours of transport), under authority of a valid transport permit.
27. All animals, whether on or off display, must have free access to outdoor areas between sunrise and sunset. No animal may be locked indoors or kept in a cage without free access to outdoor areas during this time, except where it is inappropriate for the species, under written instruction by a veterinarian or it is in accordance with the management system approved for legitimate maintenance/management purposes.
28. All outdoor enclosures shall at all times provide every animal with a full range of appropriate natural environmental conditions (such as sun, wind, shade and rain), whilst also providing sufficient protection and shelter from the elements. During unusual extreme heat or cold events mitigation measures should be implemented (such as fine spraying water for cooling or heaters). The temperature, ventilation, lighting (both levels and spectral distribution), humidity and noise levels of enclosures shall be suitable for the comfort and wellbeing of the particular species of animal at all times.
29. All night and indoor enclosures must at all times have sufficient species appropriate bedding materials and be kept clean. Night enclosures must be suitably designed and furnished to prevent animals from lying in faeces or urine. Urine soiled bedding, solid waste and faeces must be removed daily from all Indoor enclosures, or in the case of large expansive enclosures from appropriate night rooms or nesting areas.
30. All night and indoor enclosures must be of sufficient design, material and size to provide adequate shelter for every animal from heat, cold, rain, sun and wind and should allow for all animals to move freely and lie down simultaneously together if they choose.
31. There must at all times be available at the facility enough surplus enclosures sufficient to implement the temporary separation of individual animals on veterinary advice or where this

Permit Holder

Conservation, Partnerships & Ecotourism

- may be required to ensure the health, welfare or well-being of an animal.
32. In the event of any serious injury, disease or significant display of discomfort reasonably requiring veterinary examination or treatment, such animal shall be examined by a veterinarian within 24 hours of the injury or development of signs or symptoms of illness or discomfort.
 33. In the event of an animal in captivity having to be euthanased, the euthanasia shall be carried out by a veterinarian or other suitably competent person, appointed by the permit-holder, in a painless, stress-free and humane manner.
 34. On discovery dead animals must be removed immediately from the enclosure.
 35. It is the duty of the holder to dispose of all animal remains according to law.
 36. No animal kept in captivity pursuant to this permit may be released into the wild, imported to or removed from the facility or alienated (in any manner whatsoever), except under permit or written authorisation by the authorised authority.
 37. The species listed herein may be removed and transported to the following premises, provided that animals return to their main enclosure each day: The respective local Conservation Officer may inspect such at reasonable times:
 - a) Gwahumbe Private Game Reserve, Mid-Illovo
 - b) Tala Private Game Reserve, Eston
 - c) St Ledger Farm and Natal Lion Park, Lion Park Road, Camperdown
 - d) Rocky Valley game Ranch, Bisley
 - e) Durban Skydive Club, Tala Valley, Eston
 - F) Thorndale Ranch, Ashburton
 - g) Tanfield Farm, Mid-Illovo
 38. Other than when under the control of the permit holder or authorised persons, animals shall be housed in enclosures at all times.
 39. All enclosures must be constructed in a manner that ensures the safety of members of the public, visitors and staff, and shall at all times be maintained in a good order and not be allowed to fall into a state of disrepair.
 40. Enclosures must be designed, constructed and maintained so as to avoid escape. All fences, doors, gates and other means of enclosure must, at all times, be suitable to prevent any animal from escaping and must be maintained in a good and working condition. In the event of a Conservation Officer being of the opinion that the fencing, doors, gates or other means of securement are not sufficient to exclude risk of escape or injury to members of the public, the Conservation Officer may instruct the holder to implement specified means with which to prevent animal escapes and ensure the safety of members of the public and, in such event, the holder shall ensure compliance (at his cost) with such instruction within such period as may be stipulated in such instruction.
 41. In the event of the escape of a non-dangerous animal all reasonable steps shall be

Conservation, Partnerships & Ecotourism

implemented by the permit-holder (or appointed staff thereof) to capture the animal. If this is unsuccessful and it is suspected that the animal leaves the boundary of the facility the Conservation Officer shall be informed within 48 hours.

42. The indoor and outdoor enclosures must be constructed in such a manner as to allow staff easy and safe alternate access to indoor and outdoor enclosures for maintenance, cleaning and feeding purposes.
43. A system to prevent escapes must be implemented for each enclosure.
44. Every effort should be expended to ensure that no activity takes place at the facility or at premises away from the facility, during transit, exhibition or display, which may be dangerous or detrimental to the safety, health or welfare of any animal, members of the public or staff (except, in the case of staff, if it is a necessary risk, and a Standard Operating Procedure is in place for such activities, and staff have confirmed in writing that they participate willingly with full knowledge/appreciation of the dangers and risks).
45. The permit holder shall be responsible for ensuring that no breeding takes place.
46. Food appropriate for each species must be provided in sufficient quantities during morning and afternoon feeding sessions, to ensure optimum health and nutrition and must include sufficient species-appropriate protein enriched foods (like insects, nuts, seeds or eggs)
47. Food must be supplied in sufficiently varied multiple locations to allow fair access by all individuals.
48. In addition to the food supplied at feeding times, every outdoor enclosure must, at all times, from sunrise to sunset, contain adequate and sufficient fresh edible vegetation or other natural foodstuffs as appropriate for the species.
49. No primates bonded by family ties or association may be separated except on the recommendation of a veterinarian or veterinary purposes or, upon good reason given for the welfare or safety of the animals, with the approval of a Conservation Officer and then only for the period approved either by the veterinarian or the Conservation Officer.
50. This permit allows for the species contained herein to be fitted with a waist band attached to a long lead provided the species have access to protection from the elements(wind, sun and rain) and can retreat from potential threats.
